| **Changing the programme**                                          | 1. A running cycle can only be modified if it has been running for a short time. Otherwise the detergent may have already been released and the water already drained. If this is the case, the detergent dispenser must be refilled.  
2. Press the start/pause button, then press the Programme Button for more than 3 seconds to cancel the running programme.  
3. Select a new programme.  
4. Close the door, press the Start/Pause button, the machine will restart after about 10 seconds. |
| **Add forgotten dishes in the dishwasher.**                         | 1. Press the Start/Pause Button to stop the washing.  
2. Open the door a little.  
3. After the spray arms stop working, you can open the door completely.  
4. Add forgotten dishes.  
5. Close the door.  
6. Press the Start/Pause Button, the dishwasher will run after 10 seconds. |
| **If the appliance is switched off during a wash cycle.**            | If the appliance is switched off during a wash cycle, when switched on again, please re-select the washing cycle and operate the dishwasher according to the original Power-on state. |
| **Switch off the appliance**                                         | When the working cycle has finished, the buzzer of the dishwasher will sound 8 times, then stop. Turn off the appliance using the On/Off Button.                                                                     |
| **Turn off the water tap, unload the baskets**                      | Warning: wait a few minutes (about 15 minutes) before unloading the dishwasher to avoid handling the dishes and utensils while they are still hot and more susceptible to break. They will also dry better. Unload the appliance, starting from the lower basket. |
Dear Customer,
This appliance is intended to be used in household and similar applications such as:
- staff kitchen areas in shops, offices and other working environments;
- farm houses;
- by clients in hotels, motels and other residential type environments;
- bed and breakfast type environments.

Please carefully read this manual before using the dishwasher, it will help you to use and maintain the dishwasher properly.
Keep it as a refer in the later days.
Pass it on to any subsequent owner of the appliance.

This manual contains sections on safety Instructions, Operating Instructions, Installation Instructions and Troubleshooting Tips etc.

To review the section on troubleshooting Tips will help you to solve some common problems by yourself.
If you can not solve the problems by yourself, please ask for the help from professional technicians.

The manufacturer, following a policy of constant development and updating of the product, may make modifications without giving prior notice.

Loading the baskets according to (*AS/NZS 2007.1)
This appliance must be grounded. In the event of a malfunction or breakdown, grounding will reduce the risk of an electric shock by providing a path of least resistance of electric current. This appliance is equipped with a cord having an equipment-grounding conductor and a grounding plug.

The plug must be plugged into an appropriate outlet that is installed and grounded in accordance with all local codes and ordinances.

Keep children away from detergent and rinse aid, keep children away from the open door of the dishwasher, there could still be some detergent left inside.

Do not abuse, sit on, or stand on the door or dish rack of the dishwasher.

Do not touch the heating element during or immediately after use. (This instruction is only applicable to machines with a visual heating element.)

Do not operate your dishwasher unless all enclosure panels are properly in place. Open the door very carefully if the dishwasher is operating, there is a risk of water squirting out.

Do not place any heavy objects on or stand on the door when it is open. The appliance could tip forward.

When loading items to be washed:
1) Locate sharp items so that they are not likely to damage the door seal;
2) Warning: Knives and other utensils with sharp points must be loaded in the basket with their points down or placed in a horizontal position.

When using your dishwasher, you should prevent plastic items from coming into contact with the heating element. (This instruction is only applicable to machines with a visual heating element.)

Check that the detergent compartment is empty after completion of the wash cycle.

Do not wash plastic items unless they are marked dishwasher safe or the equivalent. For plastic items not so marked, check the manufacturer's recommendations.

Use only detergent and rinse additives designed for an automatic dishwasher.

Never use soap, laundry detergent, or hand washing detergent in your dishwasher. Keep these products out of the reach of children.

Keep children away from detergent and rinse aid, keep children away from the open door of the dishwasher, there could still be some detergent left inside.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Children should be supervised to ensure that they do not play with the appliance.

The dishwasher must always be connected to the water system using new hose sets.

Dishwasher detergents are strongly alkaline, they can be extremely dangerous if swallowed. Avoid contact with skin and eyes and keep children away from the dishwasher when the door is open.

The door should not be left open, since this could increase the risk of tripping.

If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.

If the appliance is installed on a carpet floor, take care that the openings in its base are not obstructed.

Remove the door to the washing compartment when removing an old dishwasher from service or discarding it.

Please dispose of packing materials properly.

Use the dishwasher only for its intended function.

During installation, the power supply must not be excessively or dangerously bent or flattened. Do not tamper with controls.

The appliance is to be connected to the water mains using new hose sets and that old hose-sets should not be reused.

The maximum number of place settings to be washed is 15.

The maximum permissible inlet water pressure is 1Mpa.

The minimum permissible inlet water pressure is 0.04Mpa.
**2. Operation Instruction**

**IMPORTANT** To get the best performance from your dishwasher, read all operating instructions before using it for the first time.

### Control Panel

1. **On/Off Button**: To turn on/off the power supply.
2. **Delay Button**: Press the button to delay the washing time.
3. **Function button**: To select the Extra Dry function or the Express wash function.
4. **Child lock button**: Press the two buttons (Delay button and Function button) simultaneously for 3 seconds to lock the operation, the same way to unlock.
5. **Program Button**: To press the button to select a wash Program.
6. **Alt Button**: Dual zone wash function, press the button to select the upper basket and top cutlery tray load only, or the lower basket load only, or all baskets load, and the corresponding indicators will be on.
7. **Start/Pause button**: To start the selected washing program or pause the washing program when the machine is working.
8. **Display screen**: To show the washing time, remaining time, washing programs and washing status etc.

- **Delay time, washing time, Remaining time, or error codes indicator**:  
- **Rinse Aid indicator**: Indicates when the dispenser needs to be refilled.
- **Extra dry indicator**: An increased temperature during the final rinse to increase drying. There is a slight increase in the energy consumption. This function can only be used with programs of Intensive, Heavy, Normal, Glass and 90min.
- **Express wash indicator**: This function can reduce the washing time. Water and energy consumption are slightly increased. This function can only be used with programs of Intensive, Heavy, Normal and Glass.
- **Alt function indicators**:  
  - Means Only the upper spray arm and top spray arm will be running.
  - Means Only lower spray arm will be running.
  - Both the indicators light on, means all the spray arms will be running.
- **Child lock indicator**:  
- **Program indicators**: Intensive, Heavy, Normal, 90min, Glass, Rapid and Soak.

### Dishwasher Features

7. Cup shelf
8. Spray arms
9. Filter assembly
10. Inlet pipe connector
11. Drain pipe
12. Adjuster
3. Prior to using for the first time

Before using your dishwasher for the first time:
A. Rinse aid dispenser
B. Detergent

A. Rinse Aid Dispenser

Rinse Aid Dispenser
The rinse aid is released during the final rinse to prevent water from forming droplets on your dishes, which can leave spots and streaks. It also improves drying by allowing water to roll off the dishes. Your dishwasher is designed to use liquid rinse aids. The rinse aid dispenser is located inside the door next to the detergent dispenser. To fill the dispenser, open the cap and pour the rinse aid into the dispenser until the level indicator turns completely black. The volume of the rinse aid container is about 110ml.

Function of Rinse Aid
Rinse aid is automatically added during the last rinse, ensuring thorough rinsing, and spot and streak free drying.

Attention!
Only use branded rinse aid for dishwasher. Never fill the rinse aid dispenser with any other substances (e.g. Dishwasher cleaning agent, liquid detergent). This would damage the appliance.

When to Refill the Rinse Aid Dispenser

If there is no rinse-aid warning light in the control panel, you can judge the amount of rinse-aid by the color of the optical level indicator “C” located next to the cap. When the rinse-aid container is full, the whole indicator will be dark. As the rinse-aid diminishes, the size of the dark dot decreases. You should never let the rinse aid get below 1/4 full.

As the rinse aid diminishes, the size of the black dot on the rinse aid level indicator changes, as illustrated below.
- Full
- 3/4 full
- 1/2 full
- 1/4 full - Should refill to eliminate spotting
- Empty

RINSE AID DISPENSER

1. To open the dispenser, turn the cap to the "open" (left) arrow and lift it out.
2. Pour the rinse aid into the dispenser, being careful not to overfill.
3. Replace the cap by inserting it aligned with "open" arrow and turning it to the closed (right) arrow.

Be careful not to overfill the dispenser, because this could cause over sudsing. Wipe away any spills with a damp cloth. Don’t forget to replace the cap before you close the dishwasher door.

Attention!
Clean up any rinse aid spilt during filling with an absorbent cloth to avoid excess foaming during the next wash.
Adjusting Rinse Aid Dispenser

![Adjust lever (Rinse)](image)

The rinse aid dispenser has six or four settings. Always start with the dispenser set on "4". If spots and poor drying are a problem, increase the amount of rinse aid dispensed by removing the dispenser lid and rotating the dial to "5". If the dishes still are not drying properly or are showing spots, adjust the dial to the next higher lever until your dishes are spot-free. The recommended setting is "4". (Factory value is "4").

**NOTE:**
Increase the dose if there are drops of water or lime spots on the dishes after washing. Reduce it if there are sticky whitish stains on your dishes or a bluish film on glassware or knife blades.

### B. Detergent

Detergents with its chemical ingredients are necessary to remove dirt, crush dirt and transport it out of the dishwasher. Most of the commercial quality detergents are suitable for this purpose.

#### Detergents

There are 3 sorts of detergents
1. With phosphate and with chlorine
2. With phosphate and without chlorine
3. Without phosphate and without chlorine

Normally new pulverized detergent is without phosphate, thus the water softener function of phosphate is not given. If detergents without phosphate were used in case of hard water often white spots appear at dishes and glasses. In this case please add more detergent to reach better results. Detergents without chlorine do only bleach a little. Strong and colored spots will not removed completely. In this case please choose a program with higher temperature.

#### Concentrated Detergent

Based on their chemical composition, detergents can be split in two basic types:
- Conventional, alkaline detergents with caustic components
- Low alkaline concentrated detergents with natural enzymes

The use of “normal” washing programs in combination with concentrated detergents reduces pollution and is good for your dishes; these wash programs are specifically matched to the dirt-dissolving properties of the enzymes of the concentrated detergent. For this reason “normal” wash programs in which concentrated detergents are used can achieve the same results that can otherwise only be achieved using “intensive” programs.

#### Detergent Tablets

Detergent tablets of different brands dissolve at different speeds. For this reason some detergent tablets cannot dissolve and develop their full cleaning power during short programs. Therefore please use long programs when using detergent tablets, to ensure the complete removal of detergent residuals.

#### Detergent Dispenser

The dispenser must be refilled before the start of each wash cycle following the instructions provided in the wash cycle table. Your dishwasher uses less detergent and rinse aid than conventional dishwasher. Generally, only one tablespoon of detergent is needed for a normal wash load. More heavily soiled items need more detergent. Always add the detergent just before starting the dishwasher, otherwise it could get damp and will not dissolve properly.
Amount of Detergent to Use

**NOTE:**
- If the lid is closed: press release button. The lid will spring open.
- Always add the detergent just before starting each wash cycle.
- Only use branded detergent and rinse aid for dishwasher.

**WARNING!** Dishwasher detergent is corrosive! Take care to keep it out of reach of children.

Proper Use of Detergent
Use only detergent specifically made for the use in dishwashers. Keep your detergent fresh and dry. Don't put powdered detergent into the dispenser until you're ready to wash dishes.

**Fill in Detergent**
Fill the detergent dispenser with detergent. The marking indicates the dosing levels, as illustrated on the right:
- **A** The place for main wash cycle detergent.
- **B** The place for pre-wash cycle detergent.

Please observe the manufacturer's dosing and storage recommendations as stated on the detergent packaging.

Close the lid and press until it locks in place.

If the dishes are heavily soiled, place an additional detergent dose in the pre-wash detergent chamber. This detergent will take effect during the pre-wash phase.

**NOTE:**
- The information about the amount of detergent for the single programme please refer to the Wash Cycle Table on the page 8.
- The detergent amount could be adjusted according to the soiling level and the specific hardness of water.
- Please observe the manufacturer's recommendations on the detergent packaging.
4. Loading the Dishwasher Baskets

Recommendation

- Consider buying utensils which are identified as dishwasher-proof.
- Use a mild detergent that is described as 'kind to dishes'. If necessary, seek further information from the detergent manufacturers.
- For particular items, select a program with as low a temperature as possible.
- To prevent damage, do not take glass and cutlery out of the dishwasher immediately after the programme has ended.

For washing in the dishwasher the following cutlery/dishes

<table>

Attention before or after loading the Dishwasher Baskets

(For best performance of the dishwasher, follow these loading guidelines. Features and appearance of baskets and cutlery baskets may vary from your model.)

Scrape off any large amounts of leftover food. Soften remnants of burnt food in pans.
It is not necessary to rinse the dishes under running water.
Place objects in the dishwasher in the following way:
1. Items such as cups, glasses, pots/panis, etc. are faced downwards.
2. Curved items, or ones with recesses, should be loaded aslant so that water can run off.
3. All utensils are stacked securely and can not tip over.
4. All utensils are placed in the way that the spray arms can rotate freely during washing.

NOTE: Very small items should not be washed in the dishwasher as they could easily fall out of the basket.

- Load hollow items such as cups, glasses, pans etc. With the opening facing downwards so that water cannot collect in the container or a deep base.
- Dishes and items of cutlery must not lie inside one another, or cover each other.
- To avoid damage to glasses, they must not touch.
- Load large items which are most difficult to clean into the lower basket.
- The upper basket is designed to hold more delicate and lighter dishware such as glasses, coffee and tea cups
- Long bladed knives stored in an upright position are a potential hazard!
- Long and/or sharp items of cutlery such as carving knives must be positioned horizontally in the upper basket.
- Please do not overload your dishwasher. This is important for good results and for reasonable consumption of energy.

Removing the Dishes

To prevent water dripping from the upper basket into the lower basket, we recommend that you empty the lower basket first and then the upper basket.
The Method Of Loading Normal Dishware

### Loading the Upper Basket

The upper basket is designed to hold more delicate and lighter dishware such as glasses, coffee and tea cups and saucers, as well as plates, small bowls and shallow pans (as long as they are not too dirty). Position the dishes and cookware so that they will not get moved by the spray of water.

### Loading the Lower Basket

We suggest that you place large items and the most difficult to clean items are to be placed into the lower basket: such as pots, pans, lids, serving dishes and bowls, as shown in the figure below. It is preferable to place serving dishes and lids on the side of the racks in order to avoid blocking the rotation of the top spray arm.

---

Please be reminded that:
- Pots, serving bowls, etc, must always be placed top down.
- Deep pots should be slanted to allow water to flow out.
- The Bottom Basket features folding spikes so that larger or more pots and pans can be loaded.

#### Adjusting the Upper Basket

The height of the upper basket can be adjusted in order to create more space for large utensils both for the upper/lower basket. The height of the upper basket can be adjusted by lift up the basket for the upper position, and up press the handle to lower the upper basket, see the picture below:

- Lift the basket for upper position
- Up press the handle to lower the basket
- Adjust handle

#### Folding back the cup shelves

For better stacking of pots and pans, the spikes can be folded down as shown in the picture right.

#### Folding Spikes of Lower Basket

For better stacking of pots and pans, the spikes can be folded down as shown in the picture right.

### Cutlery Basket

Cutlery should be placed in the cutlery rack separately from each other in the appropriate positions, and do make sure the utensils do not nest together, this may cause bad performance.

For a top quality cleaning, place the silverware in the basket making sure that:
- They do not stick together.
- Silverware is placed with the male face up.
- Long utensils in the middle.
5. Starting a washing program

### Wash Cycle Table

**NOTE:** ( *) Means: need to fill rinse into the Rinse-Aid Dispenser.

**NOTE:**

AS/NZS 2007.1: This program is the test cycle. The information for comparability test in accordance with AS/NZS 2007.1, as follows:
- Capacity: 15 setting
- Position Upper basket: Lower position
- Rinse aid setting: 6
- Open the door slightly 50mm to assist in drying of the dishes after every wash

### Turning On the Appliance

Starting a cycle wash

1. Draw out the lower and upper basket, load the dishes and push them back. It is recommended to load the lower basket first, then the upper one (see the section entitled “Loading the Dishwasher”).
2. Pour in the detergent (see the section entitled “Detergent and Rinse Aid”).
3. Insert the plug into the socket. The power supply is 220-240 VAC /50 Hz, the specification of the socket is 10A 250VAC. Make sure that the water supply is turned on to full pressure.
4. Close the door, press the ON/OFF Button, and the Power indicator light will turn on.
5. Press the program Button, the wash program will be changed as following direction: *Normal*→80min→Glass→Rapid→Soak→Intensive→Heavy→*Normal; If a program is selected, the corresponding light will be on. Then press the Start/Pause button, the dishwasher begins to start.
**Change the Program**

1. A cycle that is underway can only be modified if it has only been running for a short time. Otherwise, the detergent may have already been released, and the appliance may have already drained the wash water. If this is the case, the detergent dispenser must be refilled (see the section entitled “Loading the Detergent”).

2. Press the Start/Pause button, press the Program button more than 3 seconds, the machine will be in standby state, then you can change the program to the desired cycle setting (see the section entitled “Starting a wash cycle”).

**NOTE:**

*If you open the door during a wash cycle, the machine will pause. The program light will stop blinking and the buzzer will sound every minute unless you close the door. After you close the door, the machine will keep on working after 10 seconds.*

**Forgot to Add a Dish?**

A forgotten dish can be added any time before the detergent cup opens.

1. Press the Start/Pause button
2. Open the door a little to stop the washing.
3. After the spray arms stop working, you can open the door completely.
4. Add forgotten dishes.
5. Close the door
6. Press the Start/Pause button, the dishwasher will run after 10 seconds.

**At the End of the Wash Cycle**

When the working cycle has finished, the buzzer of the dishwasher will sound for 8 seconds, then stop. Turn off the appliance using the ON/OFF button, shut off the water supply and open the door of the dishwasher. Wait for a few minutes before unloading the dishwasher to avoid handling the dishes and utensils while they are still hot and more susceptible to breakage. They will also dry better.

**Switch Off the Dishwasher**

The program light is on but is not blinking, only in this case the programme has ended.

1. Switch off the dishwasher by pressing the ON/OFF button.
2. Turn off the water tap!

**Open the door carefully.**

Hot dishes are sensitive to knocks. The dishes should therefore be allowed to cool down around 15 minutes before removing from the appliance.

Open the dishwasher's door, leave it ajar and wait a few minutes before removing the dishes. In this way they will be cooler and the drying will be improved.

**Unloading the dishwasher**

It is normal that the dishwasher is wet inside.

Empty the lower basket first and then the upper one. This will avoid water dripping from the upper Basket onto the dishes in the lower one.

**WARNING!**

It is dangerous to open the door when washing, because the hot water may scald you.
6. Maintenance and Cleaning

Filtering System

The filter prevents larger remnants of food or other objects from getting inside the pump. The residues may block the filter, in this case they must be removed.

The filter system consists of a coarse filter, a flat (Main filter) and a microfilter (Fine filter).

Main filter 1
Food and soil particles trapped in this filter are pulverized by a special jet on the lower spray arm and washed down to drain.

Coarse filter 2
Larger items, such as pieces of bones or glass, that could block the drain and easily become trapped in the course filter. To remove the items caught by the filter, gently squeeze the tap on the top of this filter and lift out.

Fine filter 3
This filter holds soil and food residues in the sump area and prevents it from being redeposited on the dishes during wash cycle.

Filter assembly

The filter efficiently removes food particles from the wash water, allowing it to be recycled during the cycle. For best performance and results, the filter must be cleaned regularly. For this reason, it is a good idea to remove the larger food particles trapped in the filter after each wash cycle by rinsing the semicircular filter and cup under running water. To remove the filter device, pull the cup handle in the upward direction.

⚠️ WARNING! 
- The dishwasher must never be used without the filters.
- Improper replacement of the filter may reduce the performance level of the appliance and damage dishes and utensils.

Step 1: Turn the filter in anti-clockwise direction,

Step 2: Lift the filter up

NOTE: When following this procedure from step 1 to step 2, the filter system will be removed; when following it from step 2 to step 1, the filter system will be installed.
Remarks:
- Inspect the filters for blocking after every time the dishwasher has been used.
- By unscrewing the coarse filter, you can remove the filter system. Remove any food remnants and clean the filters under running water.

⚠️ **NOTE:** The entire filter assembly should be cleaned once a week.

Cleaning the Filter

To clean the coarse filter and the fine filter, use a cleaning brush. Reassemble the filter parts as shown in the figures on the previous page and reinsert the entire assembly in the dishwasher, positioning it in its seat and pressing downwards.

⚠️ **WARNING!** When cleaning the filters, don't knock on them. Otherwise, the filters could be contorted and the performance of the dishwasher could be decreased.

Cleaning The Door

To clean the edge around the door, you should use only a soft warm, damp cloth. To avoid penetration of water into the door lock and electrical components, do not use a spray cleaner of any kind.

⚠️ **WARNING!**
- Never use a spray cleaner to clean the door panel as it may damage the door lock and electrical components.
- Abrasive agents or some paper towels should not be used because of the risk of scratching or leaving spots on the stainless steel surface.

Protect Against Freezing

Please take frost protection measures on the dishwasher in winter. Every time after washing cycles, please operate as follows:
1. Cut off the electrical power to the dishwasher.
2. Turn off the water supply and disconnect the water inlet pipe from the water valve.
3. Drain the water from the inlet pipe and water valve. (Use a pan to gather the water)
4. Reconnect the water inlet pipe to the water valve.
5. Remove the filter at the bottom of the tub and use a sponge to soak up water in the sump.

⚠️ **NOTE:** If your dishwasher cannot work because of the ice, please contact professional service persons.

Cleaning the Spray Arms

It is necessary to clean the spray arms regularly for hard water chemicals will clog the spray arm jets and bearings.

To remove the upper spray arm, hold the nut, rotate the arm clockwise to remove it.

To remove the lower spray arm, pull out the spray arm upward.

Wash the arms in soapy and warm water and use a soft brush to clean the jets. Replace them after rinsing them thoroughly.
How to Keep Your Dishwasher in Shape

- After Every Wash
  After every wash, turn off the water supply to the appliance and leave the door slightly open so that moisture and odours are not trapped inside.

- Remove the Plug
  Before cleaning or performing maintenance, always remove the plug from the socket.

- No Solvents or Abrasive Cleaning
  To clean the exterior and rubber parts of the dishwasher, do not use solvents or abrasive cleaning products. Only use a cloth with warm soapy water. To remove spots or stains from the surface of the interior, use a cloth dampened with water and a little vinegar, or a cleaning product made specifically for dishwashers.

- When not in Use for a Long Time
  It is recommended that you run a wash cycle with the dishwasher empty and then remove the plug from the socket, turn off the water supply and leave the door of the appliance slightly open. This will help the door seals to last longer and prevent odours from forming within the appliance.

- Moving the Appliance
  If the appliance must be moved, try to keep it in the vertical position. If absolutely necessary, it can be positioned on its back.

- Seals
  One of the factors that cause odours to form in the dishwasher is food that remains trapped in the seals. Periodic cleaning with a damp sponge will prevent this from occurring.

7. Installation Instruction

⚠️ Attention: ⚠️
The installation of the pipes and electrical equipments should be done by professionals.

<table>
<thead>
<tr>
<th>Warning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Electrical Shock Hazard Discontinue electrical power before installing dishwasher.</td>
</tr>
<tr>
<td>Failure to do so can result in death or electrical shock.</td>
</tr>
</tbody>
</table>

● Installation Preparation

The installation position of dishwasher should be near the existing inlet and drain hoses and power cord. One side of the cabinet sink should be chosen to facilitate the connection of drain hoses of the dishwasher.

Note: please check the accompanying installation accessories (hook for aesthetic panel, screw)
Please carefully read the installation instruction.

- Illustrations of cabinet dimensions and installation position of the dishwasher
- Preparations should be made before moving the dishwasher to the installation place.

1. Choose a place near the sink to facilitate the installation of inlet and drain hoses (see figure 1).
2. If dishwasher is installed at the corner of the cabinet, there should be some space (illustrated in figure 2) when the door is opened.

**[Figure 1]**
Cabinet dimensions
Less than 5mm between the top of dishwasher and cabinet and the outer door aligned to cabinet.

**[Figure 2]**
Minimum space when the door is opened

- **Aesthetic panel's dimensions and installation**
  1. The aesthetic wooden panel could be processed according to the Figure 3.

**[Figure 3]**
The aesthetic panel should be processed in accordance with the illustrated dimensions

(Unit: mm)
2. Magical Paster A and Magical Paster B be disjoined on magical Paster A on the aesthetic wooden panel and felted magical Paster B of the outer door of dishwasher (see figure 4a). After positioning of the panel, fix the panel onto the outer door by screws and bolts (see figure 4b).

**Figure 4a**
Installation of aesthetic panel

**Figure 4b**
Installation of aesthetic wooden panel

1. Take away the four short screws
2. Pin up the four long screws
● Tension adjustment of the door spring

The door springs are set at the factory to the proper tension for the outer door. If aesthetic wooden panel are installed, you will have to adjust the door spring tension. Rotate the adjusting screw to drive the adjustor to strain or relax the steel cable (see figure 5).

Door spring tension is correct when the door remains horizontal in the fully opened position, yet rises to a close with the slight lift of a finger.

【Figure 5】
Tension adjustment of the door spring

● Connection of drain hoses

Insert the drain hose into a drain pipe with a minimum diameter of 40mm, or let it run into the sink, making sure to avoid bending or crimping it. The top of the hose must be less than 1000mm.

【Figure 6】
Dishwasher installation steps

1. Install the furniture door to the outer door of the dishwasher using the brackets provided. Refer to the template for positioning of the brackets.
2. Adjust the tension of the door springs by using an Allen key turning in a clockwise motion to tighten the left and right door springs. Failure to do this could cause damage to your dishwasher (Illustration 2).
3. Connect the inlet hose to the cold water supply.
4. Connect the drain hose. Refer to diagram. (Figure 6)
5. Connect the power cord.
6. Affix the condensation strip under the work surface of cabinet. Please ensure the condensation strip is flush with edge of work surface.
7. Place the dishwasher into position. (Illustration 4)
8. Level the dishwasher. The rear feet can be adjusted from the front of the dishwasher by turning the Allen screw in the middle of the base of dishwasher use an Allen key (Illustration 5A). To adjust the front feet, use a flat screw driver and turn the front feet until the dishwasher is level (Illustration 5B).
9. The dishwasher must be secured in place. There are two ways to do this:
   A. Normal work surface: Put the installation hook into the slot of the side plane and secure it to the work surface with the wood screws (Illustration 6).
   B. Marble or granite work top: Fix the side with Screw. (Illustration 7).
Dishwasher must be level for proper dish rack operation and wash performance.

1. Place a spirit level on door and rack track inside the tub as shown to check that the dishwasher is level.
2. Level the dishwasher by adjusting the three levelling legs individually.
3. When level the dishwasher, please pay attention not to let the dishwasher tip over.

【Figure 8】
Illustration of feet adjustment
NOTE:
The maximum adjustment height of the feet is 50 mm.

About Electricity Connecting

⚠️ WARNING!
For personal safety: DO NOT USE AN EXTENSION CORD OR AN ADAPTER PLUG WITH THIS APPLIANCE. DO NOT, UNDER ANY CIRCUMSTANCES, CUT OR REMOVE THE EARTHING CONNECTION FROM THE POWER CORD.

Electrical Requirements

Please look at the rating label to know the rating voltage and connect the dishwasher to the appropriate power supply. Use the required fuse 10 amp, time delay fuse or circuit breaker recommended and provide separate circuit serving only this appliance.

Electrical Connection

⚠️ Insure proper ground exists before use
Ensure the voltage and frequency of the power being corresponds to those on the rating plate. Only insert the plug into an electrical socket which is earthed properly. If the electrical socket to which the appliance must be connected is not appropriate for the plug, replace the socket, rather than using a adaptors or the like as they could cause overheating and burns.

GROUNDING INSTRUCTIONS

This appliance must be earthed. In the event of a malfunction or breakdown, earthing will reduce the risk of electric shock by providing a path of least resistance for the electric current. This appliance is equipped with a cord having an equipment-earthing conductor and an earthing plug. The plug must be plugged into an appropriate outlet that is installed and earthed in accordance with all local standards and requirements.

⚠️ WARNING!
Improper connection of the equipment-grounding conductor can result in the risk of an electric shock. Check with a qualified electrician or service representative if you are in doubt whether the appliance is properly grounded. Do not modify the plug provided with the appliance; If it is not fit for the outlet, Have a proper outlet installed by a qualified electrician.

**WARNING!**

Please close the hydrant after using. (For the models: no safety inlet hose.)

**Water Connection**

Connect the cold water supply hose to a threaded 3/4\(\text{inch}\) connector and make sure that it is fastened tightly in place. If the water pipes are new or have not been used for an extended period of time, let the water run to make sure that the water is clear. This precaution is needed to avoid the risk of the water inlet to be blocked and damage the appliance.

**Positioning the Appliance**

Position the appliance in the desired location. The back should rest against the wall behind it, and the sides, along the adjacent cabinets or walls. The dishwasher is equipped with water supply and drain hoses that can be positioned either to the right or the left sides to facilitate proper installation.

**How to Drain Excess Water From Hoses**

If the sink is 1000mm higher from the floor, the excess water in hoses cannot be drained directly into the sink. It will be necessary to drain excess water from hoses into a bowl or suitable container that is held outside and lower than the sink.

**Water Outlet**

Connect the water drain hose. The drain hose must be correctly fitted to avoid water leaks. Ensure that the water inlet hose is not kinked or squashed.

**Extension Hose**

If you need a drain hose extension, make sure to use a similar drain hose. It must be no longer than 4 metres; otherwise the cleaning effect of the dishwasher could be reduced.

**Syphon Connection**

Insert the drain hose into a drain pipe with a minimum diameter of 40mm, or let it run into the sink, making sure to avoid bending or crimping it. The top of the hose must be less than 1000mm.

**Start of Dishwasher**

The following things should be checked before starting the dishwasher.

1. The dishwasher is level and fixed properly.
2. The inlet valve is open.
3. There is no leakage at the connections of the conduct.
4. The wires are tightly connected.
5. The power is switched on.
6. The inlet and drain hoses are not knotted and kinked.
7. All packing and printing materials should be taken out of the dishwasher.

**Attention:** After installation, please make sure to keep this manual. The content of this manual is very helpful to the users.

</tbody>
</table>

Detergent with colourant was used. Make sure that the detergent is the one without colourant.

Improper detergent. Use only the special dishwasher detergent to avoid suds. If this occurs, open the dishwasher and let suds evaporate. Add 1 gallon of cold water to the tub. Close and latch the dishwasher, then select any cycle. Dishwasher will drain out the water at the first step. Open the door after the draining has stopped and check if the suds have disappeared. Repeat if necessary.

Spilled rinse-aid. Always wipe up rinse-aid spills immediately.

Suds in the tub. Improper detergent. Use only the special dishwasher detergent to avoid suds. If this occurs, open the dishwasher and let suds evaporate. Add 1 gallon of cold water to the tub. Close and latch the dishwasher, then select any cycle. Dishwasher will drain out the water at the first step. Open the door after the draining has stopped and check if the suds have disappeared. Repeat if necessary.

Stained tub interior. Detergent with colourant was used. Make sure that the detergent is the one without colourant.

White film on inside surface. Hard water minerals. To clean the interior, use a damp sponge with dishwasher detergent and wear rubber gloves. Never use any other cleaner than dishwasher detergent for the risk of foaming.

There are rust stains on cutlery. The affected items are not corrosion resistant.

Knocking noise in the wash cabinet. A spray arm is knocking against an item in a basket. Interrupt the programme, and rearrange the items which are obstructing the spray arm.

Rattling noise in the wash cabinet. Items of crockery are loose in the wash cabinet. Interrupt the programme, and rearrange the items of crockery.

Knocking noise in the water pipes. This may be caused by on-site installation or the cross-section of the piping. This has no influence on the dishwasher function. If in doubt, contact a suitably qualified plumber.
The dishes were not loaded correctly. See notes in “Loading the Dishwasher Baskets”.

The programme was not powerful enough. Select a more intensive programme. See “Wash Cycle Table”.

Not enough detergent was dispensed. Use more detergent, or change your detergent.

Items are blocking the path of spray arms. Rearrange the items so that the spray can rotate freely.

The filter combination in the base of wash cabinet is not clean or is not correctly fitted. This may cause the spray arm jets to get blocked. Clean and/or fit the filter combination correctly. Clean the spray arm jets. See “Cleaning the Spray Arms”.

Combination of soft water and too much detergent. Use less detergent if you have soft water and select a shorter cycle to wash the glassware and to get them clean.

Aluminum utensils have rubbed against dishes. Use a mild abrasive cleaner to eliminate those marks.

Dishes block detergent cup opens. Re-loading the dishes properly.

Improper loading Load the dishwasher as suggested in the directions.

Too little rinse-aid Increase the amount of rinse-aid/refill the rinse-aid dispenser.

Dishes are removed too soon Do not empty your dishwasher immediately after washing. Open the door slightly so that the steam can escape. Begin unloading the dishwasher only once the dishes are barely warm to the touch. Empty the low basket first. This prevents water form dropping off dishes in the upper basket.

In short program the washing temperature is lower. This also lowers cleaning performance. Choose a program with a long washing time.

Water drainage is more difficult with these items. Cutlery or dishes of this type are not suitable for washing in the dishwasher.

Error Codes

When some malfunctions come on, the appliance will display error codes to warn you:

<table>
<thead>
<tr>
<th>Codes</th>
<th>Meanings</th>
<th>Possible Causes</th>
</tr>
</thead>
<tbody>
<tr>
<td>E1</td>
<td>Longer inlet time.</td>
<td>Faucets is not opened, or water intake is restricted, or water pressure is too low.</td>
</tr>
<tr>
<td>E4</td>
<td>Overflow.</td>
<td>Some element of dishwasher leaks.</td>
</tr>
<tr>
<td>E8</td>
<td>Failure of orientation of distributary valve.</td>
<td>Open circuit or break of distributary valve.</td>
</tr>
<tr>
<td>EC</td>
<td>Fault of PCB data transmission.</td>
<td>PCB failure.</td>
</tr>
</tbody>
</table>

**WARNING!**
- If overflow occurs, turn off the main water supply before calling a service.
- If there is water in the base pan because of an overfill or small leak, the water should be removed before restarting the dishwasher.

WARRANTY REGISTRATION
Your ongoing satisfaction with your ILVE product is important to us. We ask that you complete the enclosed Warranty Registration Card and return it to us so that we have a record of the ILVE product purchased by you. Alternatively, you can now register your warranty online at http://support.eurolinx.com.au/

PRIVACY
ILVE respects your privacy and is committed to handling your personal information in accordance with the National Privacy Principles and the Privacy Act 1988 (Cth). A copy of the ILVE Privacy Policy is available at www.ilve.com.au. ILVE will not disclose any personal information set out in the Warranty Registration Card (“Personal Information”) without your consent unless required by:
1. law;
2. any ILVE related company;
3. any service provider which provide services to ILVE or assist ILVE in providing services (including repair and warranty services) to customers. Our purpose in collecting the Personal Information is to keep a record of the ILVE product purchased by you, in order to provide a better warranty service to you in the unlikely event that there is a problem with your ILVE product. ILVE may contact you at any one or more of the addresses, email addresses or telephone numbers set out in the Warranty Registration Card. Please contact ILVE on 1300 694 583 should you not wish to be contacted by ILVE.

WARRANTY
1. Warranty
ILVE warrants that each ILVE product will remain, for a period of twenty four (24) months computed from the date of purchase of the ILVE product, free from defects arising in the manufacture of the ILVE product (“Warranty”). Except for consumer guarantees set out in the Competition and Consumer Act 2010 (Cth) (“Act”), ILVE does not make any further warranties or representations in relation to ILVE products.

2. What is not Covered by the Warranty.
The Warranty does not apply if an ILVE product is defective by a factor other than a defect arising in the manufacture of the ILVE product, including but not limited to:
(a) damage through misuse (including failure to maintain, service or use with proper care), neglect, accident or ordinary wear and tear (including deterioration of parts and accessories and glass breakage);
(b) use for purpose for which the ILVE product was not sold or designed;
(c) use or installation which is not in accordance with any specified instructions for use or installation;
(d) use or operation after a defect has occurred or been discovered;
(e) damage through freight, transportation or handling in transit (other than when ILVE is responsible);
(f) damage through exposure to chemicals, dusts, residues, excessive voltage, heat, atmospheric conditions or other forces or environmental factors outside the control or ILVE;
(g) repair, modification or tampering by the purchaser or any person other than ILVE, an employee of ILVE or an authorised ILVE service contractor;
(h) use of parts, components or accessories which have not been supplied or specifically approved by ILVE.
(i) damage to surface coatings caused by cleaning or maintenance using products not recommended in the ILVE product handbook provided to the purchaser upon purchase of the ILVE product;
(j) damage to the base of an electric oven due to items having been placed on the base of the oven cavity or covering the base, such as aluminium foil (this impedes the transfer of heat from the element to the oven cavity and can result in irreparable damage); or
(k) damages, dents or other cosmetic imperfections not affecting the performance of the ILVE in respect of an ILVE product purchased as a “factory second” or from display

The Warranty does not extend to light globes used in ILVE products.

3. Domestic Use
Each ILVE product is made for domestic use. This Warranty may not extend to ILVE products used for commercial purposes.

4. Time for Claim under the Warranty
You must make any claim under this Warranty within twenty eight (28) days after the occurrence of an event which gives rise to a claim pursuant to the Warranty, by booking a service call on the telephone number below.

Continued over...
5. Proof of Purchase
Customers must retain proof of purchase in order to be eligible to make a warranty claim in respect of an ILVE product.

6. Claiming under the Warranty
Customers will bear the cost of claiming under this Warranty unless ILVE determines the expenses are reasonable, in which case the customer must claim those expenses by providing written evidence of each expense to ILVE at the address on the Warranty Registration Card.

7. Statutory Rights
(a) These terms and conditions do not affect your statutory rights.
(b) The limitations on the Warranty set out in this document do not exclude or limit the application of the consumer guarantees set out in the Act or any other equivalent or corresponding legislation in the relevant jurisdiction where to do so would:
   (i) contravene the law of the relevant jurisdiction; or
   (ii) cause any part of the Warranty to be void.
(c) ILVE excludes indirect or consequential loss of any kind (including, without limitation, loss of use of the ILVE product) and (other than expressly provided for in these terms and conditions) subject to all terms, conditions and warranties implied by custom, the general law, the Act or other statute.
(d) The liability of ILVE to you for a breach of any express or non-excludable implied term, condition or warranty is limited at the option of ILVE to:
   (i) replacing or repairing the defective part of the ILVE product;
   (ii) paying the cost of replacing or repairing the defective part of the ILVE product;
   (iii) replacing the ILVE product; or
   (iv) paying the cost of replacing the ILVE product.
(e) Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

8. Defects
Any part of an ILVE product deemed to be defective and replaced by ILVE is the property of ILVE. ILVE reserves the right to inspect and test ILVE products in order to determine the extent of any defect and the validity of a claim under the Warranty.
