Combi-Steam Oven
ILCS45X

ILVE’s ILCS45X Combination steam oven allows for cooking healthy and more flavour packed meals, preserving the nutritional properties and content. Steaming brings out the natural flavours of food, especially vegetables and meats. The combination with other heating elements also allows you to utilise traditional cooking and multi function cooking modes, with the addition of steam, which make your meals the upmost delicate in taste and appearance.

CONTROL PANEL
With a touch control panel and memory for recipes: this will ensure easy use of the oven with simplified management

OVEN CAVITY
To increase the durability and ease of cleaning, the oven interior is AS304 stainless steel.

CONDENSATION AND RECOVERY STEAM
During the cooking cycle a unique recovery system will condense and recover the water vapor emitted, entering it again in the water tank, thus making saving time with not having to refill the water tank when cooking for long periods of time.

WATER CONNECTION
Separate and removable, the device does not need a permanent water connection.

FILTER SOFTENER
The unique magnetic water softener filter will remove scale from the water tank, thus avoiding deposits in the cooking cavity that would otherwise effect the taste of your food.

MICRO PERFORATED TRAY
The oven is supplied with a tray & lid and a perforated stainless steel tray. Essential for cooking food with steam functions, in combination mode, the tray can be used for collecting liquids, both mounted within the side rack supports.

Also available is a matching 75cm or 76cm Trimkit to match this oven perfectly with ILVE’s 75cm or 76cm pyrolytic ovens.
Combination Steam Oven

- internal capacity: 35 liters
