ILVE
Dear customer,

Congratulations on your purchase of a ILVE hi-light ceramic hob.
In order to make the best use of your appliance, please carefully read the following use and care manual and keep it for later reference.

SAFETY

Precautions before using

- Unpack all the materials.
- The installation and connecting of the appliance have to be done by approved specialists. The manufacturer can not be responsible for damage caused by building-in or connecting errors.
- To be used, the appliance must be well-equipped and installed in a kitchen unit and an adapted and approved work surface.
- This domestic appliance is exclusively for the cooking of food, to the exclusion of any other domestic, commercial or industrial use.
- Remove all labels and self-adhesives from the ceramic glass.
- Do not change or alter the appliance.
- The cooking plate can not be used as freestanding or as working surface.
- The appliance must be grounded and connected conforming to local standards.
- Do not use any extension cable to connect it.
- The appliance can not be used above a dishwasher or a tumble-dryer: steam may damage the electronic appliances.
- This appliance is not intended to be operated by means of external timer or separate remote control system

Using the appliance

- Switch the heating zones off after using.
- Keep an eye on the cooking using grease or oils: that may quickly ignite.
- Be careful not to burn yourself while or after using the appliance.
- Make sure no cable of any fixed or moving appliance contacts with the glass or the hot saucepan.
- Magnetically objects (credit cards, floppy disks, calculators) should not be placed near to the engaged appliance.
- Metallic objects such as knives, forks, spoons and lids should not be placed on the hob surface since they can get hot.
• In general do not place any metallic object except heating containers on the glass surface. In case of untimely engaging or residual heat, this one may heat, melt or even burn.
• Never cover the appliance with a cloth or a protection sheet. This is supposed to become very hot and catch fire.
• This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
• Young children should be supervised to ensure that they do not play with the appliance.

Precautions not to damage the appliance

• Raw pan bottoms or damaged saucepans (not enamelled cast iron pots,) may damage the ceramic glass.
• Sand or other abrasive materials may damage ceramic glass.
• Avoid dropping objects, even little ones, on the vitroceramic.
• Do not hit the edges of the glass with saucepans.
• Make sure that the ventilation of the appliance works according to the manufacturer’s instructions.
• Do not put or leave empty saucepans on the vitroceramic hobs.
• Sugar, synthetic materials or aluminium sheets must not contact with the heating zones. These may cause breaks or other alterations of the vitroceramic glass by cooling: switch on the appliance and take them immediately out of the hot heating zone (be careful: do not burn yourself).
• WARNING: Danger of fire: do not store items on the cooking surface.
• Never place any hot container over the control panel.
• If a drawer is situated under the embedded appliance, make sure the space between the content of the drawer and the inferior part of the appliance is large enough (2 cm). This is essential to guaranty a correct ventilation.
• Never put any inflammable object (ex. sprays) into the drawer situated under the vitroceramic hob. The eventual cutlery drawers must be resistant to heat.
Precautions in case of appliance failure

- If a defect is noticed, switch off the appliance and turn off the electrical supplying.
- If the ceramic glass is cracked or fissured, you must unplug the appliance and contact the after sales service.
- Repairing has to be done by specialists. Do not open the appliance by yourself.
- **WARNING:** If the surface is cracked, switch off the appliance to avoid the possibility of electric shock.
- If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.

Other protections

- Note sure that the container pan is always centred on the cooking zone. The bottom of the pan must have to cover as much as possible the cooking zone.
- For the users of pacemaker, the magnetic field could influence its operating. We recommend getting information to the retailer or of the doctor.
- Do not to use aluminium or synthetic material containers: they could melt on still hot cooking zones.
- **NEVER** try to extinguish a fire with water, but switch off the appliance and then cover flame e.g. with a lid or a fire blanket.

STARTING-UP AND APPLIANCE MANAGEMENT

Before the first use

Clean your hob with a damp cloth, and then dry the surface thoroughly. Do not use detergent which risks causing blue-tinted colour on the glass surface.

Sensitive touch

Your ceramic hob is equipped with electronic controls with sensitive touch keys. When your finger presses the key, the corresponding command is activated. This activation is validated by a control light, a letter or a number in the display and/or a “beep” sound.
In the case of a general use press only one key at the same time.

Starting-up

You must first switching on the hob, then the heating zone:

- **Start-up/ switch off the hob:**
  - **Action**  | **Control panel**  | **Display**
  - To start   | Press key [ 0 ]    | [ 0 ]
  - Touch the key | Press key [ 0 ] | Nothing or [ H ]

- **Start-up/ switch off a heating zone:**
  - **Action**  | **Control panel**  | **Display**
  - Zone selection | Press key [ + ] | [ 0 ]
  - Increase power | Press key [ + ] | [ 1 ] to [ 9 ]
  - Decrease power | Press key [ - ] | [ 9 ] to [ 1 ]
  - Stop | Press key [ - ] | [ 0 ] or [ H ]

If no action is made within 20 second the electronics returns in waiting position.

Residual heat indication

After the switch off of a heating zone or the complete stop of the hob, the heating zones are still hot and indicates [ H ] on the display.
The symbol [ H ] disappears when the heating zones may be touched without danger.
As far as the residual heat indicators are on light, don’t touch the heating zones and don’t put any heat sensitive object on them. There are risks of burn and fire.

Automatic cooking

All the cooking zones are equipped with an automatic cooking device. The cooking zone starts at full power during a certain time, then reduces automatically its power on the pre-selected level.

- **Switching on the automatic cooking:**
  - **Action**  | **Control panel**  | **Display**
  - Zone selection | Press key [ + ] | [ 0 ]
  - Full power setting | Press key [ + ] | Pass from [ 1 ] to [ 9 ]
  - Automatic cooking | Re-press key [ + ] | [ 9 ] blinking with [ A ]
  - (for example « 7 ») | [ 7 ] blinking with [ A ]
• Switching off the automatic cooking:

<table>
<thead>
<tr>
<th>Action</th>
<th>Control panel</th>
<th>Display</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zone selection</td>
<td>Press key [+]</td>
<td>[7] blinking with [A]</td>
</tr>
<tr>
<td>Power level selection</td>
<td>Press key [-]</td>
<td>[0]</td>
</tr>
</tbody>
</table>

Extension zone (according on model)

• Switch off/on the extension zone:

<table>
<thead>
<tr>
<th>Action</th>
<th>Control panel</th>
<th>Display</th>
</tr>
</thead>
<tbody>
<tr>
<td>Zone selection</td>
<td>Press key [+]</td>
<td>[0]</td>
</tr>
<tr>
<td>Increase power</td>
<td>Press key [+]</td>
<td>[0] to [9]</td>
</tr>
<tr>
<td>Switch off</td>
<td>Touch key [®]</td>
<td>Extension zone light is off</td>
</tr>
<tr>
<td>Switch on</td>
<td>Touch key [®]</td>
<td>Extension zone light is on</td>
</tr>
</tbody>
</table>

Control panel locking

To avoid modifying a setting of cooking zones, in particular with within the framework of cleaning the control panel can be locked (with exception to the On/Off key [1]).

• Locking:

<table>
<thead>
<tr>
<th>Action</th>
<th>Control panel</th>
<th>Display</th>
</tr>
</thead>
<tbody>
<tr>
<td>Start</td>
<td>Press [1]</td>
<td>[0] or [H]</td>
</tr>
<tr>
<td>Hob locking</td>
<td>Press simultaneously [ - ] and [ + ] at left</td>
<td>No modification</td>
</tr>
<tr>
<td></td>
<td>Press key [+]</td>
<td>[L] on 4 displays</td>
</tr>
</tbody>
</table>

• Unlocking:

<table>
<thead>
<tr>
<th>Action</th>
<th>Control panel</th>
<th>Display</th>
</tr>
</thead>
<tbody>
<tr>
<td>Start</td>
<td>Press key [0/I]</td>
<td>4 x [L]</td>
</tr>
</tbody>
</table>

In the 5 seconds after start:

Unlocking the hob: Press simultaneously [ - ] and [ + ] at left
Press key [-]

MAINTENANCE AND CLEANING

Switch-off the appliance before cleaning.
Do not clean the hob if the glass is too hot because they are risk of burn.

- Remove light marks with a damp cloth with washing up liquid diluted in a little water. Then rinse with cold water and dry the surface thoroughly.
- Highly corrosive or abrasive detergents and cleaning equipment likely to cause scratches must be absolutely avoided.
- Do not use a steam cleaner to clean this appliance.
- Do not ever use any steam-driven or pressure appliance.
- Do not use any object that may scratch the ceramic glass.
- Ensure that the pan is dry and clean. Ensure that there are no grains of dust on your ceramic hob or on the pan. Sliding rough saucepans will scratch the surface.
- Spillages of sugar, jam, jelly, etc. must be removed immediately. You will thus prevent the surface being damaged.

WHAT TO DO IN CASE OF A PROBLEM

The hob or the cooking zone doesn’t start-up:

- The hob is badly connected on the electrical network.
- The protection fuse cut-off.
- The locking function is activated.
- The sensitive keys are covered with grease or water.
- An object is put on a key.

The control panel displays or [ E ]:

- Disconnect and replug the hob.
- Call the After-sales Service.
One or all cooking zone cut-off:
- The safety system functioned.
- You forgot to cut-off the cooking zone for a long time.
- One or more sensitive keys are covered.
- The pan is empty and its bottom overheated.
- The hob also has an automatic reduction of power level and breaking automatic overheating.

The automatic cooking system doesn't start-up:
- The cooking zone is still hot [ H ]
- The highest power level is set [ 9 ]

The control panel displays [ L ]:
- Refer to the chapter control panel locking page.

The control panel displays [ Er03 ]:
- An object or liquid covers the control keys. The symbol disappear as soon as the key is released or cleaned.

The control panel displays [ ER21 ]:
- The hob is overheated, let it cool and then turn it on again.

The control panel displays [ U400 ], [ Er25 ]or [ U4 ]:
- The hob is not connected to the network. Check the connection and reconnect the hob.

If one of the symbols above persists, call the SAV.

ENVIRONMENT PRESERVATION
- The materials of packing are ecological and recyclable.
- The electronic appliances are composed of recyclable, and sometimes harmful materials for the environment, but necessary to the good running and the safety of the appliance.

- Don't throw your appliance with the household refuses
- Get in touch with the waste collection centre of your commune that is adapted to the recycling of the household appliances.
INSTALLATION INSTRUCTIONS

The installation comes under the exclusive responsibility of specialists. The installer is held to respect the legislation and the standards enforce in his home country.

How to stick the gasket:
The gasket supplied with the hob avoids all infiltration of liquids in the cabinet. His installation has to be done carefully, in conformity of the following drawing.

![Diagram showing how to stick the gasket](image)

Fitting - installing:
- The cut out sizes are:

<table>
<thead>
<tr>
<th>Reference</th>
<th>Cut-size</th>
</tr>
</thead>
<tbody>
<tr>
<td>ILC604B</td>
<td>560 x 490 mm</td>
</tr>
<tr>
<td>ILC70B</td>
<td>560 x 490 mm</td>
</tr>
<tr>
<td>ILC90B</td>
<td>750 x 490 mm</td>
</tr>
</tbody>
</table>

- Ensure that there is a distance of 50 mm between the hob and the wall or sides.
- The hobs are classified as “Y” class for heat protection. Ideally the hob should be installed with plenty of space on either side. There may be a wall at the rear and tall units or a wall at one side. On the other side, however, no unit or divider must stand higher than the hob.
- The piece of furniture or the support in which the hob is to be fitted, as well as the edges of furniture, the laminate coatings and the glue used to fix them, must be able to resist temperatures of up to 100 °C.
- The mural rods of edge must be heat-resisting.
- Not to install the hob to the top of a not ventilated oven or a dishwasher.
- To guarantee under the bottom of the hob casing a space of 20 mm to ensure a good air circulation of the electronic device.
- If a drawer is placed under the work, avoid to put into this drawer flammable objects (for example: sprays) or not heat-resistant objects.
- Materials which are often used to make worktops expand on contact with water. To protect the cut out edge, apply a coat of varnish or special sealant. Particular care must be given to applying the adhesive joint supplied with the hob to prevent any leakage into the supporting furniture. This gasket guaranties a correct seal when used in conjunction with smooth work top surfaces.
- The safety gap between the hob and the cooker hood placed above must respect the indications of the hood manufacturer. In case of absence of instructions respect a distance minimum of 760 mm.
- The connection cord should be subjected, after building, with no mechanical constraint, such for example of the fact of the drawer.
- WARNING: Use only hob guards designed by the manufacturer of the cooking appliance or indicated by the manufacturer of the appliance in the instructions for use as suitable or hob guards incorporated in the appliance. The use of inappropriate guards can cause accidents.
ELECTRICAL CONNECTION

- The installation of this appliance and the connection to the electrical network should be entrusted only to an electrician perfectly to the fact of the normative regulations and which respects them scrupulously.
- Protection against the parts under tension must be ensured after the building-in.
- The data of connection necessary are on the stickers place on the hob casing near the connection box.
- The connection to the main must be made using an earthed plug or via an omnipolar circuit breaking device with a contact opening of at least 3 mm.
- The electrical circuit must be separated from the network by adapted devices, for example: circuit breakers, fuses or contactors.
- If the appliance is not fitted with an accessible plug, disconnecting means must be incorporated in the fixed installation, in accordance with the installation regulations.
- The inlet hose must be positioned so that it does not touch any of the hot parts of the hob or even.
- If the electrical supply is restricted, means of all-pole disconnection must be accessible and incorporated in the fixed wiring in accordance with the wiring rules.

**Caution!**

This appliance has only to be connected to a network 230 V~ 50/60 Hz
Connect always the earth wire.
Respect the connection diagram.
The connection box is located underneath at the back of the hob casing. To open the cover use a medium screwdriver. Place it in the slits and open the cover.

* calculated with the simultaneous factor following the standard EN 60 335-2-6/1990

**Connection of the hob**

**Setting up the configurations:**
For the various kinds of connection, use the brass bridges which are in the box next the terminal

**Monophase 230V~1P+N**
Put a bridge between terminal 1 and 2.
Attach the earth to the terminate “earth”, the neutral N to terminal 4, the Phase L to one of the terminals 1 or 2.

**Biphase 400V~2P+N**
Attach the earth to the terminate “earth”, the neutral N to terminal 4, the Phase L1 to the terminals 1 and the Phase L2 to the terminal 2.

**Caution!** Ensure that you correctly attach the wires and the bridges and tighten the screws properly.

**We cannot be held responsible for any incident resulting from incorrect connection or which could arise from the use of an appliance which has not been earthed or has been equipped with a faulty earth connection.**
